

Goethe's Science in the Structure of the "Wanderjahre"

By Alfred G. Steer

University of Georgia Press. Paperback. Book Condition: new. BRAND NEW, Goethe's Science in the Structure of the "Wanderjahre", Alfred G. Steer, Published in 1979, this study is intended as a continuation of the work of the scholars and previous commentators on Goethe's Wanderjahre. While considering the scientific structure, it concentrates first on one basic question of form - that of the series of narrative insertions - and then of necessity on one matter of content that is linked so closely with them that the two are almost inseparable, namely the concept of the family as the Urform (archetype) and metamorphosis of the types of human association. Thus the intention of this book is to contribute to the new and better understanding of the novel and which will, it is to be hoped, at long last help the work take its place as one of the two crowning masterpieces (along with "Faust II") of Goethe's life.
