paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 136 Publisher: Southeast University Pub. Date :2011-05-01 version 1 by gold inflammation compiled the application of statistical computation hydrology and water resources for the analysis of hydrology and water resources in the application of probabilistic methods of calculating the initial reading and the actual operation of the tool. The main contents are: Probability and Statistics in the field of hydrology and water resources applications. basic knowledge of statistical parameter estimation methods and applications. data interpolation and extension and analysis of the relationship between the return series and associated calculations. design data to provide flood low-flow frequency analysis. sampling error problems. Application of statistical computing hydrology and water resources. the content easy to understand layman's language. The calculation of various hydrology and water resources. not only describes the hand-calculation method. also described the use of Excel software to calculate on the computer. without programming. the calculation is simple. Listed in the appendix for a description of specific issues and application forms. Application of statistical computing hydrology and water resources as a secondary audience of more than workers in hydrology and water resources for irrigation. meteorology. geology. geography. transportation. agriculture and other departments of the staff. but also as a reference for tertiary students books or tutorials. Contents: 1 1.1 probability of random events and the study of probability theory of inevitability and hydrological phenomena 1.2 1.3 random events and the probability of an event the significance of the type 1.4 1.5 1.6 incident direct calculation of the probability of the frequency multiplication theorem of probability 1.7 1.8 1.9 Probability Addition Theorem the probability of two random variables and Theorem 2 the probability distribution of random variables 2.2 2.1...
